PROFILE

Full-Stack Developer with **2+ years** building end-to-end products. Currently leading a **Next.js/Node/Prisma/MySQL ERP** and two **IPTV apps: Mobile (Expo/React Native iOS/Android)** and **TV (Android TV/tvOS + Web)**, with **CI/CD** (Drone CI + Gitea → Portainer) and **Docker**. Focused on performance, developer experience, and best practices (i18n, caching, observability). I thrive on measurable impact and full ownership.

TECHNICAL SKILLS

- **Frontend:** React, Next.js, React Native (Expo), TypeScript, Tailwind, Vite
- **Backend:** Node.js, Express, Prisma, REST; (past: Flask)
- **DB:** MySQL, SQL; (past: MongoDB)
- **Mobile/TV:** Expo, expo-router, react-native-tvos, EAS
- **DevOps:** Docker (multi-stage), Drone CI, Gitea, Portainer
- **Practices:** i18n (next-intl), caching/TTL, SSR, a11y, metrics/logging
- **Languages:** Spanish (native), English

WORK EXPERIENCE

Full-Stack Developer — PyP Technologies

Jan 2025 – Present

- ERP architecture & delivery with Next.js/React/TS (SSR, dynamic routing).
- REST API using Node/Express/Prisma/MySQL; domain modules with RBAC.
- i18n via next-intl (es/en/pt) plus accessibility/performance practices.
- Docker multi-stage (image size [-30/50%]) with health checks.
- CI/CD on Drone CI + Gitea; 0-touch deploys to Portainer via webhooks.
- Basic observability: structured logging, metrics & alerts [add stack if relevant].
- IPTV Mobile (Expo/RN): secure Xstream login (SecureStore), categories/EPG, adaptive HLS/TS/MP4 playback, expo-router, persistent theming.
- Mobile perf: TTFP [-20/30%], fewer re-renders, TTL caching for categories/streams.
- IPTV TV (Android TV/tvOS + Web): focus/DPAD UX, debounced preview, single fullscreen player; extension heuristics with fallback.
- TV distribution: EAS profiles; UI parity across native TV and Web.

Tech: Next.js, React, TypeScript, Node, Express, Prisma, MySQL, Docker, Drone CI, Gitea, Portainer, next-intl, Expo 53, React Native 0.79, expo-router, react-native-tvos.

Frontend Developer - Clak

Mar. 2024 - Agos 2024

- Startup similar to Retool.com, focused on improving simplicity, the learning curve, and enhancing the user experience with ChatGPT for tool creation facilitation.
- Developed web views using React, TypeScript, Tailwind CSS, Vite.js, and Next.js.
- Collaborated with UI/UX designers to create the landing page using Figma.
- Designed a Storybook and Design System to maintain visual consistency.
- Implemented and optimized frontend forms, integrating with backend endpoints in Python (Flask).
- Continuously enhanced the user experience by integrating advanced tools with ChatGPT.

Tech: React, TypeScript, Tailwind CSS, Vite.js, Next.js, Figma, Python, Flask.

Software Developer - Junco Films

Jan. 2024 - Feb. 2024 [Junco Films - Website](#)

- Developed and maintained interactive tools and web applications.
- Integrated social media APIs (Facebook, TikTok, Discord) for social data analysis.
- Created a multi-platform web workspace with Flask and ReactJS.
- Developed an SVG file editor for advanced graphic manipulation.
- Automated Blender renders using Python, optimizing content production workflows.

Tech: Flask, ReactJS, Python, Blender, Social Media APIs.

Backend Developer - B2Gov

Sept. 2022 - Sept. 2023 [B2Gov - Website](#)

- Focused on the development of robust and scalable backend solutions.
- Implemented a data scraping system from international public procurement portals using Python and BeautifulSoup.
- Extracted and manipulated data in compliance with the Open Contracting Data Standard (OCDS).
- Stored scraped data in MongoDB and optimized the performance to handle large datasets.

Tech: Python, BeautifulSoup, MongoDB, MongoDB Compass, Flask.

PERSONAL PROJECTS

Game Development - Global Game Jam - Unity 2D Developer

Jan- 2022 [Global Game Jam - Alasine Game](#)

- Developed a game in 48 hours for the Global Game Jam, using C# and Unity 2D.
- Implemented part of the graphical interface, learned Unity libraries, and collaborated in a Git repository with teammates.

Tech: C#, Unity 2D, Git.

Building a 3D Printer - Electronic Technician Internship

2019 - 2020  3D Printer Photos

- Built a 3D printer from scratch, programming motors and configuring extruders.
- Calibrated the printer and used Cura software for 3D printing.
- Overcame logistical and technical challenges to complete a fully functional project.

Tech: Motor programming and calibration, Cura, Arduino.

Hackathon Participation - Smart City Dashboard

Nov. 2018 - Dec. 2018

- Participated in a school hackathon to develop a "Smart City" dashboard.
- Configured a dashboard for real-time monitoring of city services using Arduino.
- Developed an intuitive interface for controlling traffic lights, water pumps, and vehicle tracking.
- Collaborated with multiple teams and achieved a podium finish in the event.

Tech: Arduino, UI/UX, Monitoring Dashboard.

EDUCATION

Instituto Politécnico Superior, Rosario — Analista Univ. en Sistemas

- 2021–2023

Coderhouse — Python — Django, POO, Git/GitHub

- Dic 2021 – Mar 2022

Coderhouse — JavaScript — Storage/JSON, Librerías, AJAX/Fetch, Node.js

- Sep 2022 – Nov 2022

Coderhouse — React JS — JSX, Routing/Navigation, Eventos, Consumo de APIs, Firebase

- Ene 2023 – Mar 2023

Coderhouse — React Native — Redux, Login & auth, SQLite

- Abr 2023 – Jun 2023

Coderhouse — SQL — Funciones, Stored Procedures, Triggers, Workshop DCL/TCL

- Ago 2023 – Nov 2023
